CONTAINERIZED WASTE STATION

“Waste management equipment for the demanding maritime and offshore industry that gets the job done efficiently, safely and in an environmentally responsible manner.”

Options:

The Containerized Waste Station has been developed and designed for the maritime and offshore industry. The CWS is a compact, flexible and mobile solution

Vessels with a high number of crew and long voyage times such as offshore installations, vessels, offshore construction vessels, windmill installation vessels, various platforms and many others have to be flexible in order to follow MARPOL Annex V /IMO MEPC 201 (62) regulations for waste handling. To arrange waste handling and storage inside existing vessels is often an expensive solution or simply not possible due to lack of available space. This is where Containerized Waste Station can be the right solution.
